

ANNETTE STANTON, Ph.D.

Professor

University of California, Los Angeles

HEALTH PSYCHOLOGY

Dr. Annette Stanton's research centers on specifying factors that help and hinder individuals as they adjust to health-related adversity. She is interested in testing theories of stress and coping and related conceptual models in individuals and couples confronting cancer, reproductive problems, and other stressors.

Dr. Stanton is a Senior Research Scientist at the UCLA Center for Psychoneuroimmunology and a nationally recognized researcher in the field of women's health and cancer.

Dr. Annette Stanton is a baccalaureate KU alumna. She returned to KU to serve as a faculty member. She has served as an Adjunct Research Associate, Assistant Professor and Associate Professor for the Department of Psychology.
